

# DIY BB Gun

Written By: Nicholas Petrizzio

## TOOLS:

- [Scissors \(1\)](#)

## PARTS:

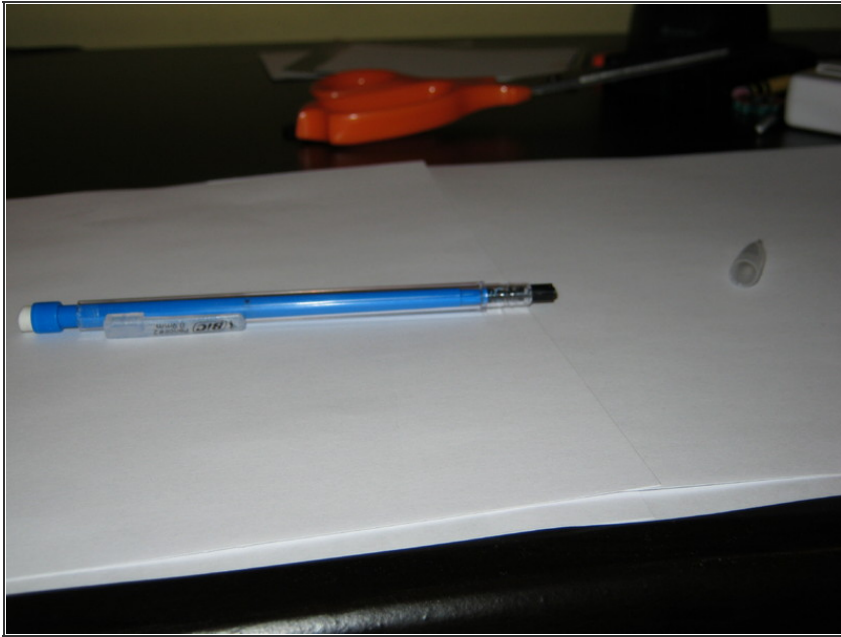

- [Mechanical pencil \(1\)](#)
- [Rubber band \(1\)](#)

## SUMMARY

### LEGAL ADVISORY!!!!!!

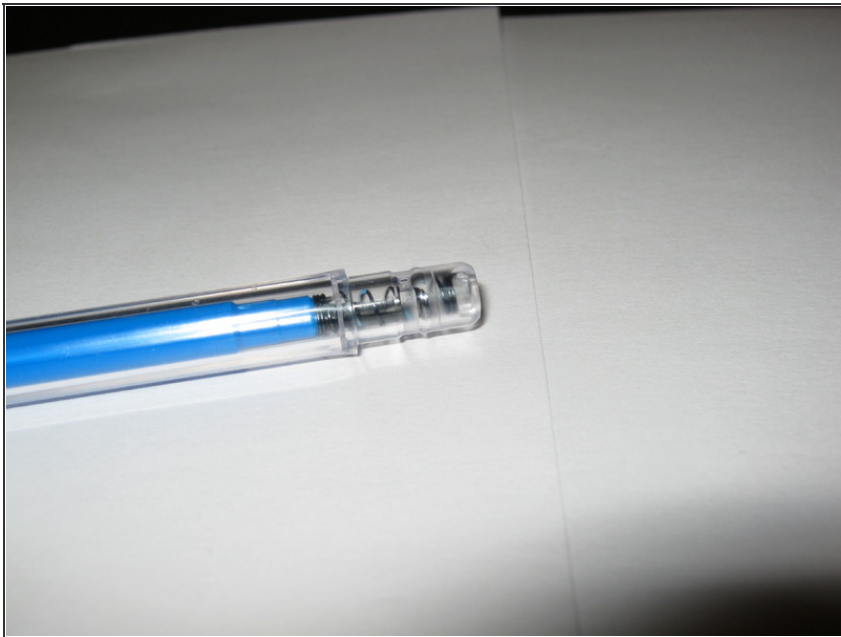

**IF YOU HURT SOMEONE AND BRING ME TO COURT, I WILL NOT TAKE RESPONSIBILITY AND I WILL PRINT THIS TO SHOW MY ADVISORY!**

## Step 1 — DIY BB Gun

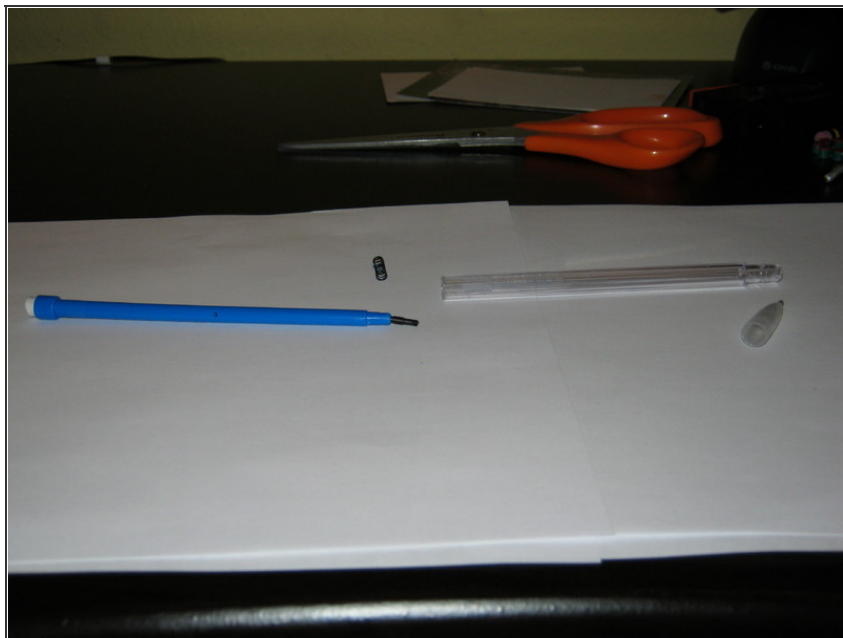

- Remove the top of the pencil (just pull it off with your teeth).

## Step 2

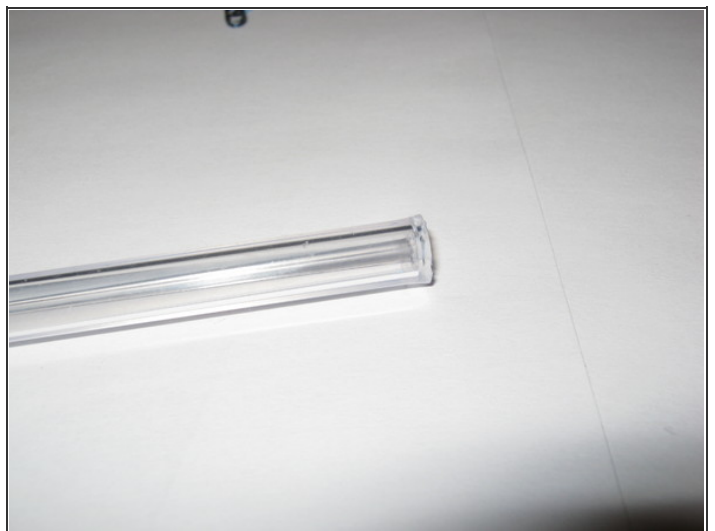

- Cut the part where the lead ejects.

### Step 3

- Pull the core out.
- Throw out the tip and save the spring as it can be useful in the future.

### Step 4

- Cut the part on the pencil body so it is gone and cut the lead core where I did.

## Step 5

- Put a rubber band on the clip.

## Step 6

- Pull the rubber band behind the eraser hole and insert the eraser (or use whatever works for you).
